SKILLS

Skills: HTML, CSS, Javascript, React, NextJs, SQL, NoSQL, REST Api, Requirements Gathering

EXPERIENCE

Vista Musical Instruments Corporation

Singapore

Web Developer

Jan 2022 - Mar 2025

- Maintained an existing unified Shopify theme that spanned across multiple stores such as Swee Lee Music (SG/MY/ID/VN/BN), Heritage Guitars, MONO, Harmony Guitars.
- Involved new features as well as QoL updates on Shopify Liquid, HTML/CSS, JS and React, such as:
 - Participated in the 2024/25 company brand refresh. Built the new site navigation header and drawer using JS for Swee Lee
 - Customer reviews section on product pages built using React, allowing users to submit their reviews and rate products, resulting in improved product transparency. This component was also subsequently converted to a pure class-based JS component during a theme cleanup to reduce dependancy on React.
 - Pushed for theme cleanup and optimisation by migrating legacy section/snippet components to the more lightweight pages json feature.
 - Shopify checkout.liquid customisation using Javascript to support a customised “Click & Collect” shipping options, as well as to hide/show custom payment options.
 - Regular Shopify CMS updates & customisations. Crafted various Shopify flows to support alternate image feature for products. Supported the use of legacy *Algolia* version of product database.
 - Supported the E-commerce manager in the management of Google Analytics. Worked with the UX engineers to create and run A/B tests.

Skills: Shopify Liquid, HTML/CSS, Javascript, React, E-commerce management, Algolia

HackerTrail

Frontend Developer

Singapore
May 2021 - Jan 2022

- Contributed to the development of the internal candidate management platform in Angular 8, including implementing key workflows and building the boolean candidate search feature that enabled more accurate and efficient candidate filtering.
- Rebuilt the client-facing recruitment assessment platform from the ground up in Angular 12, improving performance, usability, and maintainability across the product.

Skills: Angular, HTML/CSS, Javascript, Typescript

Tata Consultancy Services

Systems Engineer

Singapore
Aug 2019 - May 2021

Contributed across enterprise development, front-end engineering, and business analysis roles for major digital transformation projects.

- At Tata Consultancy Services, worked closely with the senior engineer to build an internal workflow application for processing project bids using Microsoft Power Platform. Also conducted KT sessions to onboard users.
- At Sembcorp, helped build an energy monitoring dashboard using Angular for displaying real-time Renewable Energy Certificate (REC) data. Also collaborated on UI/UX design for a new online product catalogue using Adobe XD.
 - <https://shorturl.at/LCdd1>
- At Rolls-Royce Singapore, worked closely with the Digital Transformation Team and translated complex software logic into clear documentation for stakeholders and supported product management through research, roadmap creation, and brand design work.
 - Consolidated and documented the complete business profile of the Digital Transformation team for a key leadership presentation.

Skills: Angular, HTML/CSS, Javascript, Typescript, Java, Sprint Boot, MS Power Platform, Technical Documentation, Business Analytics

PROJECTS

Park my Ride SG

July 2025 - Present

Community-driven platform created to help riders easily locate motorcycle parking across Singapore. Aggregates information from HDB and URA, then fills the gaps using crowdsourced inputs from riders and local communities.

Frontend: Next.js 15

Backend: MongoDB

Gym Payment App - Freelance

Oct 2025 - Present

Payment tracking web-app for a gym based in Singapore. App ingests transactional data fed by a *HitPay* web-hook, and is tracked and stored, allowing for accurate revenue monitoring.

Frontend: Next.js 15

Backend: MongoDB
